REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: With regards to the claims the prior art of record does not disclose or fairly teach a tuner element having a non-uniform distribution of the effective dielectric permittivity along an axis of tuner displacement, said non-uniform distribution of the effective dielectric permittivity is realized by subdividing the tuner element into a number of sections cross-sectional portions, each of which is distinguishable by their geometrical shape or size in the dimension perpendicular to said axis of tuner displacement or by a value or distribution of the dielectric coefficient ϵ_r along said axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
